A PRIVATE WELCOME FROM HELIGANDER

To our honored guest,

Thank you for entering the **Prophecy Vault** and requesting this private preview package for **AGE OF PROPHECY: DOOM OF ALADFAR**. On behalf of all of us, I am pleased to welcome you at the very beginning.

What you now hold is more than a simple sample. It is your first step into a larger universe — one shaped by royal bloodlines, ancient grievances, sacred inheritance, political fracture, and prophecy whose consequences reach far beyond a single throne.

This preview package has been assembled to give you an early look into the opening movement of **Volume One**. Inside, you will find a preview edition of the graphic novel, along with a brief call to action should you wish to continue the journey with us.

The story begins on the eve of a grand royal celebration in **Heligander**, capital of the five-planet **Aladfar Consortium**. Beneath its lights gather nobles, royals, and old ambitions — all under the illusion of ceremony, stability, and control. As you will soon discover, such illusions rarely endure.

We are honored to share this early access edition with you, and even more honored to have your interest at this stage of the journey. Stories like this are built not only by those who regale them, but also by those who choose to enter the world and walk beside them.

Thank you for being here.

With gratitude,

Erasmus Ver
